AirServer Connect2

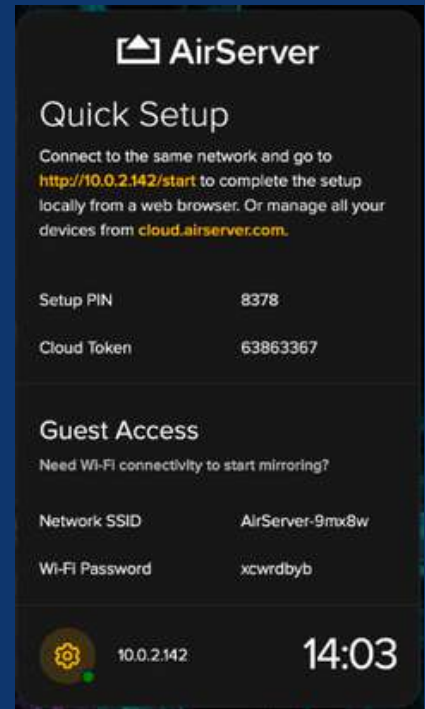

1 Turn on by pressing the power button.

2 To start the configuration, follow the on-screen instructions.

If the AirServer Connect 2 is connected to a network using an ethernet cable, Quick Setup can be done through a web browser on a computer or mobile device on the same network.

Simply type in the IP address shown in the instructions and at the bottom left of the homescreen.

Once the device Management page has loaded, type in the SETUP PIN to get started

A If the AirServer Connect 2 is not connected using an ethernet cable, you must first connect a computer or a mobile device to the Guest Wi-Fi shown in the Guest Access section on the on-screen menu.

You can then type the IP address shown in the instructions into your browser to start the Quick Setup

3 Once set up is complete, all settings can be accessed by selecting **ADVANCED SETTINGS**

The on-screen display will no longer show the Quick Setup instructions

It is recommended to log into advanced settings and check for updates in the **UPDATES** section, as new firmware may be available
